

# Bhargav Sanjaybhai Patel

## Software Engineer

TX, United States | +1 (682) 406-8937 | [bspatel2134@gmail.com](mailto:bspatel2134@gmail.com) | [Linkedin](#) | [GitHub](#) | Open to relocate

### SUMMARY

Software Engineer with 3+ years of experience designing, developing, and deploying scalable web applications, REST APIs, microservices, and cloud-based systems. Strong hands-on experience with Python, Django, Flask, FastAPI, PostgreSQL, React.js, Docker, Kubernetes, CI/CD, and AWS. Skilled in backend architecture, database optimization, API development, asynchronous processing, and Agile software delivery. Additional experience integrating AI/ML features such as predictive models, LLM-based chatbots, embeddings, and vector search into production-ready software applications.

### SKILLS

**Programming Languages:** Python, JavaScript, TypeScript, SQL, HTML5, CSS3, Bash  
**Backend Development:** Django, Flask, FastAPI, Django REST Framework, REST APIs, GraphQL, gRPC, Microservices, Event-Driven Architecture  
**Frontend Development:** React.js, Angular, Redux, Next.js, Bootstrap, Material UI, Tailwind CSS  
**Databases & Caching:** PostgreSQL, MySQL, MongoDB, Redis, Oracle DB, Elasticsearch  
**DevOps & Cloud:** Docker, Kubernetes, AWS EC2, S3, Lambda, Terraform, GitHub Actions, Jenkins, Nginx  
**Messaging & Data Pipelines:** RabbitMQ, Kafka, Celery, Airflow, ETL Pipelines  
**Testing & Tools:** PyTest, Postman, Selenium, Swagger/OpenAPI, Git, JIRA, Confluence, SonarQube  
**AI/ML Exposure:** scikit-learn, pandas, NumPy, PyTorch, TensorFlow, Hugging Face, OpenAI APIs, LangChain, RAG, Embeddings, Vector Search, FAISS, Pinecone

### WORK EXPERIENCE

#### Datadog, TX | Software Engineer Aug 2025 - Current

- Developed and maintained scalable web applications using **FastAPI, React.js, PostgreSQL, and REST APIs**, improving internal platform usability and reducing manual reporting effort by **30%**.
- Designed and optimized backend API services for analytics dashboards, reducing average API response time by **25%** through query optimization, pagination, and caching improvements.
- Built responsive React.js dashboard components to visualize operational and business data, enabling users to track key metrics in real time and improving decision-making efficiency.
- Implemented asynchronous task processing using **Celery and RabbitMQ**, improving background job handling capacity by **40%** and reducing delays in high-volume data workflows.
- Integrated an AI-assisted internal support chatbot using LLM APIs, reducing repetitive team queries by **25%** and improving access to internal documentation.
- Implemented vector-based search and embeddings for knowledge retrieval, improving search relevance and reducing information lookup time by **30%**.
- Contributed to Docker and Kubernetes-based deployment workflows, improving application scalability and reducing environment-related deployment issues.

#### Chargebee, India | Software Engineer Jan 2022 - Aug 2024

- Developed predictive models for transaction monitoring, fraud detection, and risk analysis using Python and scikit-learn.
- Developed and maintained backend services, REST APIs, and database-driven applications using **Python, Django, Flask, PostgreSQL, and Redis**, supporting secure transaction and reporting workflows.
- Built and optimized payment, transaction, and reporting modules, improving system reliability and reducing transaction processing errors by **20%**.
- Led migration of legacy monolithic modules to microservices architecture using **Docker and Kubernetes**, improving scalability and reducing deployment downtime by **35%**.
- Designed and implemented CI/CD pipelines for automated testing, code quality checks, and deployment, reducing release effort by **40%** and improving deployment reliability.
- Optimized SQL queries, indexes, and backend logic, reducing API response time by **25%** and improving application performance under high-traffic conditions.
- Automated ETL pipelines for financial data ingestion, validation, transformation, and analytics reporting, saving **10+ hours per week** of manual work.
- Implemented monitoring, logging, and debugging improvements, reducing production issue resolution time by **30%**.
- Collaborated with product managers, QA engineers, and frontend developers to deliver business-critical features in Agile sprints, improving delivery timelines and cross-team coordination.

### EDUCATION

**Master's Degree in Computer science** | University of Texas at Arlington, USA  
**Bachelor's Degree in Computer engineering** | Shree Swami Atmanand Saraswati Institute of Technology, India

### PROJECTS

#### Financial Transaction Monitoring Platform

- Developed a transaction monitoring platform using **Django, PostgreSQL, REST APIs, and React.js** to process financial records and generate real-time dashboards for business users.
- Implemented optimized database queries, indexing, and Redis caching, reducing API response time by **20%** and improving dashboard loading performance.
- Built transaction ingestion, validation, filtering, and reporting modules, improving data accuracy and reducing manual review effort.

#### Microservices-Based Order Management System

- Designed and developed a microservices-based order management system with separate services for orders, payments, and notifications, improving scalability and maintainability.
- Implemented asynchronous communication using **RabbitMQ**, reducing direct service dependencies and improving system reliability.
- Containerized services using **Docker** and supported Kubernetes-based deployment, improving deployment consistency across environments.
